## PROJECT :-

### SikshyaSetu - *Smart College Management Platform*
**Tech:** React, Node.js, MongoDB
**Features:** Role-based user access, QR-based attendance system
**Description:** A modern college management platform built to streamline daily operations by digitizing attendance, user management, and academic workflows. It provides secure multi-role access for admins, teachers, students, and parents, along with a fast QR attendance system powered by a scalable MERN architecture.

### Twinkle Lady – *E-commerce Platform*
**Tech:** Html, CSS, Js, MongoDB, Stripe/Payment Integration
**Features:** Carts, Products & Pricing, MongoDB, Payment integration
**Description:** An online accessories storefront built to manage and display products with a clean, modern UI. Includes an admin dashboard for adding and updating products, secure customer authentication, and a smooth shopping experience with cart, wishlist, and order tracking. Designed with a scalable MERN architecture to support fast loading, mobile-friendly layouts, and consistent brand visuals for Twinkle Lady's accessory business.
